- Worked on a project for an industrial web application.

EDUCATION

Bachelor of Engineering in Electronics and Communication

Babaria Institute of Technology (GTU)

TECHNICAL SKILLS

- C#, .Net Framework
- Asp.Net Core
- Web Forms and Windows Forms
- MySQL and MsSQL
- Java script and JQuery
- Angular Js
- AWS and Azure service
- Asp.Net MVC
- Web API
- Windows Service
- HTML, Bootstrap3&4 and CSS
- Vue Js
- SMS and Payment Gateway Integration

MY MAJOR PROJECTS / WORKS

CAI Application for Flipkart

According to customer requirements, updates the CAI application where I used numerous **Azure services**. Created a number of additional supporting Windows services.

Shopping site

I had created a Shopping site using Asp.net MVC and My SQL server. It is a fully featured shopping web application along with the **PayU money payment gateway** and auto generated email sending option.

leave management system

I developed an Employee Leave Management System using ASP.NET MVC and MySQL Server. I integrated it with the **Textlocal SMS gateway**, enabling notifications for approved leave to be sent directly to employees' cell phones.

TheQuickCab

I developed a cab booking application where I integrated the **Google Distance Matrix API** to calculate distances between two cities, and used **SMSLane** (an SMS gateway) to send booking confirmation SMS.
